

Environmental Policy

Rediweld Rubber & Plastics Ltd. recognise that our activities and services may generate environmental impacts and we are committed to minimising our negative impacts.

It is the intention of Rediweld Rubber & Plastics Ltd:

- Continually improve environmental performance;
- Comply with all relevant environmental legislation.
- Increase staff awareness and competence through the provision of adequate and suitable information, instruction, training and supervision
- Prevent pollution, minimise waste and promote energy efficiency, through the development of environmental objectives and targets; and
- Work with suppliers, contractors and subcontractors, to improve their environmental performance.

This policy is communicated to all persons working for, or on our behalf, within our premises or whilst at external locations.

Provide suitable management structure with the Managing Director responsible for maintaining and annually reviewing the Environmental Policy.

This policy is kept up to date, in particular with regards to changes in our Company's activities and legislative changes. It is reviewed and revised on at least an annual basis by the Management Team.

We remind all employees that they must make themselves familiar with, and conform to, our Environmental Policy.

Signed.

A handwritten signature in black ink, appearing to read 'P. L. Norman'.
